Warning: The path from Grigoriou to Dionysiou is challenging. Pilgrims need to be careful, especially if not physically fit.

This magnificent route connects the three monasteries of the rocks. It has special importance as it is the start of the SW route from *Simonopetra*, which then continues to *Ag. Pavlou*, *Ag. Anna*, *Mount Athos Summit* and the ‘desert’ (*erimos* in Greek) and thence to *Megisti Lavra*. This route is one of the most beautiful on all Athos, offering spectacular views down the western coast of Athonite peninsula, Mount Athos summit and nearby *Sithonia*.

The first half, from *Simonopetra* to *Grigoriou*, starts as a traditional *kalderimi* (stone paved path) which descends to the sea. The attractive path then continues parallel to the shore and through the olive groves of the Monastery, but ends with an unattractive track just before *Grigoriou*. The second half, from *Grigoriou* to *Dionysiou*, is almost entirely on footpath. The views from the path are stunning, but, the walk is much more difficult than the short distance between the monasteries might suggest. Pilgrims should be very careful.

Note: All distances given (in metres) should be taken as approximate. The numbers shown in the form **1** are Waypoints to be found in associated GPS tracking. The route described is liable to unpredictable change: for example, forestry work, road or track construction and plant growth may alter the route, or its appearance. Signposts may disappear or new ones appear. The Friends of Mount Athos strives to keep this description correct and up to date but cannot take responsibility for its accuracy.
